If you can design it, you can build it with VERSA-LOK.

No matter how challenging your landscaping problem may be, there's a VERSA-LOK® retaining wall system that can resolve it with engineered elegance.

VERSA-LOK is the original solid, pinned segmental retaining wall system. Since 1987, VERSA-LOK has set the standard for excellence and versatility in retaining wall design and construction. With six systems from which to choose—Standard, Cobble®, Accent®, Square Foot™ and random-pattern Harmony and Mosaic®—if you can design it, you can build it with VERSA-LOK.

From 4-foot-tall backyard garden walls to 40-foot-tall serpentine retaining walls, the possibilities are limitless with the amazing flexibility of VERSA-LOK's six systems. But VERSA-LOK isn't just for retaining walls anymore. Its uniquely engineered design also enables the creation of multiangle curves and corners, stairs, columns and freestanding walls, all with a single unit—no specialty pieces required. Available in two distinctive textures—classic split-face and vintage Weathered™—and a variety of colors, VERSA-LOK retaining wall systems provide landscape professionals with a full palette of creative options.

VERSA-LOK's solid, low-absorption, high-strength concrete units are virtually maintenance-free. Famous for easy installation by contractors and homeowners alike, VERSA-LOK is the first choice of architects and engineers when beauty and brawn are specified in a retaining wall system. VERSA-LOK. One original design. Six solid solutions.

the original solid, pinned system

VERSA-LOK retaining wall systems—Standard, Mosaic, Cobble, Accent and Harmony—feature solid construction and a unique hole-to-slot pinning system. The solid design of VERSA-LOK units means there are no voids to fill, which ensures easy, reliable installation and longer-lasting durability. Modifications of solid units are a snap and facilitate limitless design possibilities.

VERSA-LOK's top-pinning system provides greater stability and increased design flexibility. Pins are inserted into holes in upper-course units and tapped into slots in lower-course units. This series of holes and slots provides a 3/4-inch setback of each course and enables a variable bond. Pins also aid in the placement of geogrid soil reinforcement, which is essential for the construction of walls taller than 4 feet.

standard

The Standard unit is the backbone of VERSA-LOK retaining wall systems. Its solid construction, classic proportions and top-pinning design provide the foundation for the entire family of VERSA-LOK systems. Curves, corners, columns, stairs and freestanding walls are all possible using the Standard unit.

Weight - 82 lbs., Size - 6" tall, 16" wide, 12" deep, Face Area - 2/3 s.f. Minimum Radius - 8', VERSA-TUFF Pins - 2 per unit

cobble

At half the width of the Standard unit, Cobble offers an appealing lightweight alternative to the Standard unit without compromising strength. Cobble is an ideal solution for small garden walls, planters and perimeter walls. And its narrower design enables the construction of curves with a tighter radius.

Weight - 38 lbs., Size - 6" tall, 8" wide, 12" deep, Face Area - 1/3 s.f. Minimum Radius - 4' 4", VERSA-TUFF Pins - 2 per unit

harmony

The VERSA-LOK Harmony retaining wall system uses Standard and Cobble wall units to create designs limited only by your imagination. Cobble units can be set randomly among Standard units or the two types of unit can be set in a repeating ratio.

Size - 6" tall, 12" deep, Face Area - Varies, VERSA-TUFF Pins - 2 per unit.

accent

Accent, a sleek version of the Standard unit, is the lightest-weight member of the VERSA-LOK family. Its slim profile has a clean, understated appearance that serves to highlight its surroundings. Accent reflects the look of natural stone walls and also is capable of curved walls with a tighter radius.

Weight - 36 lbs., Size - 4" tall, 12" wide, 12" deep, Face Area - 1/3 s.f. Minimum Radius - 3', VERSA-TUFF Snap-off Pins - 2 per unit

mosaic

Mosaic comprises three VERSA-LOK units—two Accent, one Cobble and one Standard—in a series of four-unit panels that are blended to create stunning walls with a random face pattern. Mosaic opens up a new realm of design options and readily accommodates geogrid soil reinforcement to take random-pattern walls to unlimited heights.

Panel Size - 10" tall, 24" wide, 12" deep, Combination of one Standard, one Cobble, and two Accent units. Panel Face Area - 1-2/3 s.f., Minimum Radius - 8', VERSA-TUFF Snap-off Pins - 8 per panel

square foot

Square Foot is a premium cored unit that covers a full square foot of wall face economically, making it a low-cost alternative for some commercial applications. Its trapezoidal shape and top-pinning system allow for variable bond construction, accurate alignment, tighter vertical joints and easy installation. Square Foot's unique design enables a near-vertical setback, and its thick face affords greater durability than other cored systems.

Weight - 86 lbs., Size - 8" tall, 18" wide, 12" deep, Face Area - 1 s.f. Minimum Radius - 8', VERSA-TUFF Pins - 2 per unit
